Attorney Docket No. <u>SOM920030004US1</u>

<u>IN THE SPECIFICATION</u>

Please amend the paragraph beginning on page 14, line 19 as follows:

FIGs. 12 and 13 show the design process flow pyramid. It can be noticed that on the project line, the resolution becomes higher and higher when more and more designers are involved (because they will input via a business-to-business integration platform such as IBM Corporation's Websphere Business Integration Connection) with annotated data about their check points). This is one of the types of information that the dashboard monitor displays.
